

Children use **SMART** rules in school:
S - Keep **safe** by being careful not to give out personal information (such as, name, email address, phone number, home address or school name) to people who you don't trust online.

M - **Meeting** someone you have only been in touch with online can be dangerous. Only do so with your parents' or carers' permission, and even then only when they go with you.

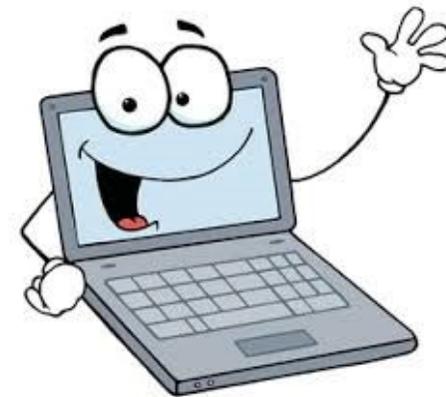

A - **Accepting** emails, IM messages or opening files, pictures or texts from people you don't know or trust can lead to problems. They may contain viruses or nasty messages.

R - Someone online may be lying about who they are and information you find on the internet may not be **reliable**.

Computing and e-safety subject
leader

E-safety

The enclosed information is in response to the recent questionnaires at our e-safety workshop and assembly.

Thank you for your comments.
I hope you find it useful.

Thank you to those who attended our recent e-safety workshop and assembly. We hope you found it both informative and enjoyable. We value your comments on questionnaires, these help us to plan future teaching and learning experiences, as well as necessary events and training. I have tried

Parental control on electronic devices

These differ depending on your device. However, generally speaking within the settings menu on the device there will be a restrictions tab/page. This will enable you to set parental controls and set age restrictions for content accessed. It is always a good idea to have a password on every device. Each manufacturer will have

Always use **google safe search** – this can be enabled in the settings section of google. This also has an option of setting a password to prevent

It is a good idea to encourage

Pop ups/allowing access

You can stop pop-ups, this is in the settings menu of each application. For more detailed guidance see You Tube. When pop ups attempt to access a site, you will usually be given an option on the bottom of your screen to tempo-

We should act as **role models** and set good examples for our children. Social media is not the place to let off steam. Unfortunately consequences of such behaviour is becoming more common and we should remember that problems can be solved

Cyber bullying is taken seriously and treated according to our anti bullying and Computing policies. Examples of cyber bullying may include, sharing other children's photographs online, without their permission, or sending unkind messages to others.

Age restrictions

Due to advertising, the age restriction on social media sites is 13. Always check your privacy settings on Social Media accounts to keep your personal information safe! This is usually accessed in the administrator/user account area of the site.
