

I like *Geography* because I like looking at pictures of other countries and where I've been on holiday.

I wish we could learn more about the people in other countries as well as the landmarks.

I really like looking at maps because you can see everywhere in the world.

It is easy to know when we are learning about *Geography* because we are talking about the world and countries.

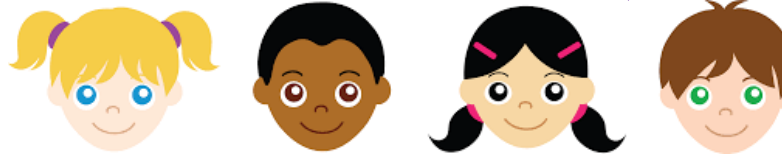

Geography is very important because things on the earth are too, and we need to know more about climate change to stop it.

I love learning about the seas and the world.

I enjoyed learning about the world biomes and the animals that live there.

I wish we could do *Geography* more often!

I know I'm getting better at *Geography* because I know more places and about them.

Subject: **Geography**

What our children said ...

We learn about *Geography* when we have Atlases out on the tables.

We learned about volcanoes and made a volcano that erupted!

Geography is important because you need to know where places are if you want to go somewhere in the world or be a pilot.

Greta Thunberg is a good Geographer. She knows about the world and what to do to help it

I really enjoy learning about countries and their capital cities and flags.

We have been learning about a video with a little boy not wanting to go to school and we send pictures of pirates exploring and travelling the world!

Geography would be better if we got to go on more class trips or on holiday.

You get to learn about countries you might never go to in your life.
